

BAI - Webinar

Topic:

Private market benchmarks for portfolio / risk management and regulated institutional investors

Date:

February 5, 2026
11:00 a.m. – 12.00 p.m. (CET)

Benchmarks play an essential role in the investment process at all stages from asset allocation to performance monitoring and risk reporting management. Benchmarking errors or biases can lead to loss of performance, excessive risk taking, costly rebalancing and compound the denominator effect. In this webinar, we explore optimal benchmarking of private infrastructure funds, examine benchmarking best practices, and discuss how benchmarks fit within the supervisory regulatory frameworks of investors such as VAG (Solvency 1 / AnIV and Solvency 2) or CRR.

AGENDA
